

**SOME ECLIPSE IMAGES** by EarthSky  
**Beverley Sinclair**, who saw the eclipse outside Charleston, South Carolina wrote: "The skies were very cloudy leading up to totality but, miraculously, slowly cleared as totality approached."

**Karl Diefenderfer** saw the eclipse in Dillard, Georgia. He wrote: "To witness totality was one of the most humbling experiences of my life!"

**Steven Simmerman**, who saw the eclipse from Wilson, Wyoming, wrote: "Extremely clear sky. Saw shadow bands, leaf lens images, drastic drop in temperature and light as well. Other celestial objects popped out. I didn't plan for the darkness and I lost sight of my camera settings. Overall, an awesome experience!"

**Eliot Herman**, who saw it in Idaho. Wow!

**Chirag Upreti** caught the star Regulus in the constellation Leo the Lion, under the eclipsed Sun. He wrote: "During totality, the Sun's gorgeous corona was visible with the unaided eye, and below that lay Regulus the heart of Leo. The two-and-a-half-minute show was spectacular, magical in every aspect."

**Michael Rodriguez** caught the eclipse from Jackson, Wyoming.

**Rob Pettengill** in Torrington, Wyoming. The diamond ring effect, solar flares, and chromosphere.

Eclipse and jet from Michael Velardo at St. Clair Shores, Michigan.

**Larry Bohlayer** wrote: "Raindrops on eclipse glasses tell our story watching from western North Carolina. Turned out, the weather forecast was right ... clouds moved in just before totality, but we saw some partial phases."

Trees acting as natural pinhole projector revealing solar eclipse on the campus of East Tennessee University
